Wintersberger, Ulrike, 239
Wiser, Mark F., 305
Wolff, S.N., 249

Subject Index to Volume 21

Adipocyte, rat, 161
α-D-mannosidase, 107
Amiloride, 63
Amino acid analysis, 195
Antibodies, 187
Antigens, 299
Anti-idiotypes, 179
Autoantibodies, 179, 219
Autoimmunity, 299

β-adrenergic receptors, 187
BHK cell adhesion, 119
Binding assay, 63
Biosynthesis, 129
Butyric acid, 1

cAMP, 209, 289
Cell cycle, 77, 239
Cell surface, 277
Cellulose, 19
Chagas' disease, 299
Chromatin, 249
Cloudman S91 in culture, 289
Colony formation, 29
Colony-stimulating factor (CSF), 263
  CSF_{GM}, 151
  CSF_1, 151
Corneal fibroblasts, 277
Cytoplasmic calcium, 1
Cytoplasmic membrane surface, 233

Differentiation, 63, 263
Digitonin, 141
Dimethyl sulfoxide (DMSO), 1
Disuccinimidyl suberate, 161
DNA-binding, 19
DNA synthesis, 239
Dodecyl sulphate gel electrophoresis, 161

Endogenous lectin, 119
Epidermal growth factor (EGF), 29, 63, 209
Erythropoietin, 93
Estrogen, 251
Estrogen receptor-mediated cytotoxicity, 39

Feline sarcoma virus proteins, 9
Fibroblasts, 29
Fibronectin, 129, 277
Follicle-stimulating hormone, 209
Functional mRNA, 47

Genetic complementation, 289
Globin, 93
Glycoprotein, 263
Gonadotropin-releasing hormone, 209
Granulocyte/macrophage colonies, 263
Granulosa cells, 209
Growth stimulation, 63

H^+, 141
  vesicular H^+ transport, 141
Heme, 93
Hemoglobin synthesis, 93
Hemopoiesis, 263
Hepatocyte differentiation, 47
Holoreceptors, 19
Hormonal regulation, 47
Hormone receptors, 209
Human fibroblasts, 107
Hypoxanthine, 1

Immune response, 299
Immunoaffinity chromatography, 219
Immunopathogenesis, 299
Immunoprophylaxis, 299
Insulin, 289

Insulin-binding species, 161
Insulin-immunized mice, 179
Insulin receptor, 161, 179
Inverted membrane vesicles, 233
Iodine-125, 39
Iodoantipyrine, 39
Iododeoxyuridine, 39
Iodotamoxifen, 39
Isoelectric focusing, 219

K^+-ATPase, 77, 141
K^+ transport, 63

Lectins, 249
Leukemia, 249
Lymphocytes, 249
Lysosomes, 107

Malaria, 305
Melanoma, 129, 289
Melanotropin, 289
Membrane cholesterol, 141
Microsomal vesicles, gastric, 141
Monoclonal antibodies, 9, 219, 277, 299
MSH, 289
Murine erythroleukemia, 1

Na^+, 77
  transport, 63
Neuroblastoma, 63
Neuroblastoma cells, 77
Normal mouse serum, 29
Nuclear antigens, 249

Oligodeoxynucleotides, 19
Ouabain binding, 77

Peptides, 29
Pituitary fibroblast growth factor, 195
Plasmodium
  berghei, 305
  chabaudi, 305
Polyamine stimulation, 305
Polyoma virus, 239
Proliferation, 249
Proliferation, cell, 289
Protein kinase, 305
Protein lateral mobility, 77
Protein phosphorylation, 289

Quercetin inhibition, 305

Receptor asymmetry, 233
Receptor purification, 219
Receptor subunits, 219
Receptors
  alpha-adrenergic, 219
  beta-adrenergic, 219
  dopamine, 219
  insulin, 233
  muscarinic acetylcholine, 219
  neurotransmitter, 219
Red cell membrane, 233
Regulation, 77

Secretion, 129
Serum stimulation, 239
Silver staining, 195
Succinylacetone, 93
SV40, 239
Swainsonine, 107

Target size analysis, 219
3T6 mouse fibroblasts, 239
Trypanosoma cruzi, 299
Tyrosine, 9
Tyrosine aminotransferase, 47
Tyrosine phosphorylation, 9

Uptake, 107

Contents

Volume 21, Number 1 **1983**

ARTICLES

Ionic Regulation of MEL Cell Commitment, **Robert Levenson, Ian Macara, Lewis Cantley, and David Housman** 1

Monoclonal Antibodies to Feline Sarcoma Virus *gag* and *fes* Gene Translational Products, **Fulvia Veronese, Gary J. Kelloff, Fred H. Reynolds, Jr., Richard W. Hill, and John R. Stephenson** 9

Oligodeoxynucleotide Base Recognition by Steroid Hormone Receptors, **S. Anand Kumar, Thaisa A. Beach, and Herbert W. Dickerman** 19

Normal Mouse Serum Contains Peptides Which Induce Fibroblasts To Grow in Soft Agar, **U.R. Rapp, M. Gunnell, H. Marquardt** 29

Estrogen Receptor-Mediated Cytotoxicity Using Iodine-125, **W.D. Bloomer, W.H. McLaughlin, R.A. Milius, R.R. Weichselbaum, and S.J. Adelstein** 39

Development of Tyrosine Aminotrasferase in Perinatal Rat Liver: Changes in Functional Messenger RNA and the Role of Inducing Hormones, **Stephanie T. Perry, Robin Rothrock, Kenneth R. Isham, Kai-Lin Lee, and Francis T. Kenney** 47

Loss of EGF Binding and Cation Transport Response During Differentiation of Mouse Neuroblastoma Cells, **C.L. Mummery, P.T. van der Saag, and S. W. de Laat** 63

Membrane Regulation of the Na^+, K^+-ATPase During the Neuroblastoma Cell Cycle: Correlation With Protein Lateral Mobility, **E.J.J. van Zoelen, C.L. Mummery, J. Boonstra, P.T. van der Saag, and S.W. de Laat** 77

Volume 21, Number 2 **1983**

ARTICLES

Inhibition of Heme Synthesis in Bone Marrow Cells by Succinylacetone: Effect on Globin Synthesis, **Nega Beru, Kenneth Sahr, and Eugene Goldwasser** 93

The Uptake of Swainsonine, a Specific Inhibitor of α -D-Mannosidase, Into Normal Human Fibroblasts in Culture, **Kokila Chotai, Christine Jennings, Bryan Winchester, and Peter Dorling** 107

Interactions of a Mammalian β-Galactoside-Binding Lectin With Hamster Fibroblasts, **D. Stojanovic, R.C. Hughes, T. Feizi, and R.A. Childs** 119

Biosynthesis and Secretion of Fibronectin in Human Melanoma Cells, **Thomas F. Bumol and Ralph A. Reisfeld** 129

Role of Cholesterol in the Structure and Function of Gastric Microsomal Vesicles, **Tushar K. Ray, Jyotirmoy Nandi, Andrew Dannemann, and Gerald B. Gordon** 141

Adipocyte Insulin-Binding Species: The Size and Subunit Composition of the Larger Binding Species, **H. Joseph Goren, C. Elliott, and R.A. Dudley** 161

Mice Immunized to Insulin Develop Antibody to the Insulin Receptor, **Yoram Shechter, Dana Elias, Ruth Maron, and Irun R. Cohen** 179

INVITED REVIEW

CSF-1 —A Mononuclear Phagocyte Lineage-Specific Hemopoietic Growth Factor, **E.R. Stanley, L.J. Guilbert, R.J. Tushinski, and S.H. Bartelmez** 151

Volume 21, Number 3 1983

ARTICLES

Immunological Studies of β-Adrenergic Receptors, **P.O. Couraud, B.Z. Lu, A. Schmutz, O. Durieu-Trautmann, C. Klutchko-Delavier, J. Hoebeke, and A.D. Strosberg** 187

Purification and Partial Characterization of Bovine Pituitary Fibroblast Growth Factor, **Sandra K. Lemmon and Ralph A. Bradshaw** 195

Epidermal Growth Factor and Gonadotropin-Releasing Hormone Inhibit Cyclic AMP-Dependent Luteinizing Hormone Receptor Formation in Ovarian Granulosa Cells, **Michael Knecht and Kevin Catt** 209

The Orientation of Insulin Receptors in the Red Cell Membrane, **Gerhard Baumann, Edith C. Abramson, and Elaine C. Drobny** 233

Butyrate Inhibits Mouse Fibroblasts at a Control Point in the G1 Phase, **Erhard Wintersberger, Ingrid Mudrak, and Ulrike Wintersberger** 239

INVITED REVIEW

Autoantibodies and Monoclonal Antibodies in the Purification and Molecular Characterization of Neurotransmitter Receptors, **Claire M. Fraser, Roger Greguski, Barbara Eddy, and J. Craig Venter** 219

Volume 21, Number 4 1983

ARTICLES

Antigens in Chromatin Associated With Proliferating and Nonproliferating Cells, **R.C. Briggs, G. Brewer, A. Goldberger, S.N. Wolff, and L.S. Hnilica** 249

Purification of a Human Urinary Colony-Stimulating Factor, **Fung Fang Wang and Eugene Goldwasser** 263

Cell-Surface Associated Proteins of Corneal Fibroblasts: Dissection With Monoclonal Antibodies, **Nirmala Sundar Raj, Judith Martin, and C.V. Sundar-Raj** 277

Interactions Between Insulin and the Cyclic AMP System of Cloudman S91 Mouse Melanoma Cells, **John Pawelek, Janet Emanuel, Richard Kahn, Marilyn Murray, and Robert Fleischmann** 289

A Plasmodium Protein Kinase That Is Developmentally Regulated, Stimulated by Spermine, and Inhibited by Quercetin, **Mark F. Wiser, John W. Eaton, and J.R. Sheppard** 305

INVITED REVIEW

Trypanosoma cruzi: The Immunological Consequences of Infection, **Leslie Hudson** 299
